physical education teacher and a university faculty member. During the final semester of the senior year, candidates complete a full semester of student teaching at both the elementary and secondary levels.

Those who enjoy sports and physical activity and would like to impact the lives of children and adolescents may find teaching physical education to be the ideal major. There continues to be a need for dedicated and effective physical education teachers in the schools, especially at a time when the percentage of children and adolescents who are obese in the United States is at an all-time high level. Within the next several years, the "baby boomers" who are currently teaching will be retiring, and the need for new teachers will increase dramatically. Students who graduate with a degree in physical education are also prepared to work with youth in community recreation, family fitness and sports centers, and to coach school and youth sports.

Students interested in majoring in physical education should first declare pre-physical education as a major and sign up to meet with an advisor in the College of Education and Human Services advising center and talk with a faculty member in the physical education program located in HC 104.

To apply for admission to the teacher education program, students must:

In addition, students must meet the following requirements for admission into Education. Courses in parentheses are GCTC course equivalencies.
